What is the situation regarding Mesurol and Maize?

2020 sees a big change to maize seed dressings due to the withdrawal of Mesurol on maize seed in the UK. Mesurol (active substance: methiocarb) deters feeding damage by corvids/rooks, pigeons and other birds. It also helps control frit fly and improves establishment, ensuring the optimum number of plants per hectare.

- Y O \$SXYXa ROX RO OCN W LON \$ONN \$Q Z \$Q
- Only limited varieties will be available with Mesurol so orders must be placed early.

Speak to Spunhill about the alternative seed treatments are available for maize in 2020
